To whom it may concern:

As a senior academic physician - and urologic patient - it is a privilege and a pleasure to commend the work of Prof Dr Nuno Tomada.

Before having the good fortune of encountering Dr Tomada, I had experienced some substandard care.... hence it was a welcome relief to meet a specialist of his caliber.

Dr Tomada brings a wealth of professional experience to his practice, acquired over many years in the hospital clinic and operating room. Expertise, careful follow-up, research activity, a congenial attitude: among the cardinal attributes of an excellent physician, as exemplified in this setting.

The outcome in my case was very satisfactory. Beyond clinical and technical skill, Dr Tomada brought a warm, engaging manner to our interactions.

Dr Tomada's accomplishments have earned him the esteem and accolades of his peers, not only in Portugal but internationally. Indeed, he is undoubtedly the leading specialist in this corrective / reconstructive field in the country.

I have no hesitation in making this eager recommendation of Dr Tomada, with my appreciation.

- Michel Trudel, MD, FRCPC

Associate Professor (former)
McGill University Faculty of Medicine
